

Harley Williams

SOFTWARE ENGINEER

Objective

Software Engineering graduate (2:1) with strong foundations in software development and problem-solving. Hands-on experience building and maintaining full-stack web applications, writing clean and maintainable code, and debugging real-world systems. Seeking a graduate or junior software developer role where I can continue developing my skills and contribute to high-quality software solutions.

Skills

- JavaScript / TypeScript, Python, Java, C
- HTML, CSS, Bootstrap
- MongoDB, SQL (basic)
- Git, GitHub, Agile/Scrum methodologies
- Problem-solving and debugging

Experience

TRVentilation – Full-Stack E-commerce Website 2025-2026

Designed and developed a full-stack e-commerce platform using React, Node.js, MongoDB, and Stripe. Implemented user authentication, product listings, shopping cart functionality, and checkout flows. Debugged issues related to state management, validation, and API integration, and refactored code to improve readability and maintainability.

Bar Staff – Spiders Night Club, Hull 2023 – Present

Worked efficiently under pressure in a fast-paced environment, demonstrating strong teamwork, communication, and time management skills.
